[Write a Review](#) [Read 2 Reviews](#)

Printfoam is a soft, but dense foam material that easily takes an impression made by a pencil, stick, or other object. The surface is so sensitive that any shape can be pressed into it for printing textures.

It's great for teaching young children the principles of printmaking because there's no need for sharp tools. Use water-based inks and any kind of paper to produce dozens of sharp prints.

Each package contains ready-to-use sheets that are 1/16" thick.

Class Pack — This special value classroom assortment includes 100 sheets of 4" x 6", 60 sheets of 6" x 9", 96 sheets of 9" x 12", and 48 sheets of 12" x 18". see also ...
